- L:** Pizza oven
- M:** Existing treeline enhanced with orchard
- N:** Farm: vegetables grown and ag certified for use in school cafeteria

BROCCOLI HEADQUARTERS

AT LEATAATA FLOYD

FACT SHEET

Food Literacy Center's new "Broccoli HQ" will be located at a 2.5-acre urban farm on the Leataata Floyd Elementary School campus in the Northwest Land Park neighborhood of Sacramento. The project was approved in January, 2016 and is expected to be built and open in late 2017.

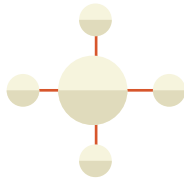

THE "BROCCOLI HQ" WILL ALLOW FOOD LITERACY CENTER TO:

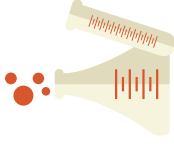

Serve 600 elementary and high school students

Add school day food literacy curriculum in addition to existing after school programs. Food literacy is as critical as reading and math.

Expand Food Literacy programming for Sacramento schools from eight schools to over 16 throughout the district

Implement cooking and nutrition classes such as food science and biology, and history and culture through cuisine

Provide farm and garden education including plant biology, compost and the biology of beneficial insects

Further their mission of inspiring kids to eat their vegetables!
