

About Food Literacy Center

Why food literacy is needed:

In Sacramento, 40% of children suffer from childhood obesity or are overweight. This directly increases their risk for Type 2 diabetes.

These diet-related diseases are preventable if we eat our vegetables. Yet only 4% of kids are eating the recommended amount of fruits and veggies.

We work in low-income schools where students are at highest risk for diet-related diseases. Most of them are food and nutrition insecure.

How we help kids:

- Serve Title 1 schools in the Sacramento City Unified School District, focusing on South Sacramento
- Free, online cooking and nutrition classes
- Inspire kids to eat their vegetables
- Fresh produce distribution to food and nutrition insecure students and their families
- Bring joy and trauma-informed food literacy teaching approach to promote resilience
